

## Zino Bonyan Nic

### Introduction

Zino Bonyan Nic is a professional supplier with more than a decade of specialized and operational experiences in designing and providing medical equipment and launching hospitals and health centers in several projects in Iran and overseas. Moreover, it is one of the oldest companies in Iran in this area with the purpose of managing, coordination, optimization, increasing quality, reducing running time and also reducing overall cost in designing hospital in all parts of Iran. This consultant using a professional and specialized team in health and treatment areas with efficient methods and national and international standards along with the cooperation of employers, executors and beneficiaries has performed many diagnostic and therapeutic projects. The main difference of this consultant is in designing level, volume and also kind of diagnostic and therapeutic services (designing of therapeutic services) and also their adaptation with physical spaces and technical specification of medical equipment for hospitals and health centers. Consequently, it leads to not to facing with any duplication over a period of providing medical equipment for hospital, not to wasting employer resources and also not to dissatisfaction of medical team and beneficiary group. Zino Bonyan Nic using its scientific experience in medical equipment area in a science-based space has shared its knowledge with hospitals and health centers for buying new medical equipment, laboratory equipment and also imaging systems.

**Moreover, some of our activities for giving advices to centers are as follows:**

- Providing suitable layout table of shares in private hospitals

- Designing and standardization of diagnostic and therapeutic spaces
- Providing electrical and mechanical requirements for installation and launching equipment
- Designing of central medical gas systems
- Designing laundry and central sterilization units
- Providing software and related specialized systems such as automation systems
- Presenting medical equipment according to features in each ward of hospitals
- Providing consultation services for improving usage and increasing efficiency of equipment and also replacing old equipment with new ones
- The process of teaching users for making use of therapeutic systems
- Introducing medical equipment companies with their warranty and after-sale services
- Introducing systems and equipment that possesses international standard and certifications
- Consultation and supplying final goods and semi-final goods in all wards of hospital and health centers
- Consultation and supplying of laboratory equipment and chemical materials for research centers
- Introducing different equipment and systems for calibration of medical equipment
- Implementing accreditation scheme for hospital
- Obtaining technical documents and performing official tasks related to manufacturing license warrant for supplying and providing drug items

The most important goal and dream of our company is to satisfy our customer requirements along with the highest global standards and quality and the lowest possible price for them. Managers and staffs in. Zino Bonyan Nic have done their best to give the best and highest qualities to their customers.

**The following services will provide for the employers over the period of building and providing medical equipment for the hospital:**

- Maintenance
- Perfect supervision in installation and launching of equipment
- Providing medical equipment
- Providing layout table of medical equipment
- Investigation and control architectural maps
- Budgeting and calculating finances of project
- Obtaining therapeutic plans
- Feasibility study
